2nd European Workshop on Skin immune mediated inflammatory diseases (SIMID)

Verona, Italy 11th-13th October 2018

Linking pathogenic pathways shared by skin inflammatory diseases to new immunoregulatory drugs

The continuous growth in the understanding of the molecular mechanisms of skin immunology, inflammatory cutaneous diseases and skin manifestations of extracutaneous disease deserves special attention. Old inflammatory skin diseases are receiving new interpretations based on the advancements on the molecular bases of innate immune responses. Pathways and mediators shared by different diseases are being elucidated. Many new treatment options are becoming available, increasing the need of forums where basic, translational and clinical research are presented together.

Sessions:

1. Workshops
2. Lectures
3. Free communication sessions
4. Posters

Topics:

1. Mechanisms of autoimmunity
2. Regulation of immune response
3. Skin microbiota
4. Vasculitis syndromes
5. Neutrophils and immunity
6. Neutrophilic dermatoses
7. Autoinflammatory syndromes
8. Hidradenitis suppurative
9. Lupus erythematosus
10. Dermatomyositis
11. Vitiligo
12. Alopecia areata
13. Psoriasis
14. Psoriatic arthritis
15. Pustular psoriasis
16. Urticaria
17. Atopic dermatitis
18. Chronic itch
19. Pemphigus
20. Pemphigoids
